

# EyeSuite Toric Calculator Quick Guide

EyeSuite offers three different Toric IOL calculators: Barrett Toric Calculator, Olsen Toric Calculator and a commercial calculator. It is recommended that your software has been updated to the latest version i8.1.1 or higher. Please contact Technical Support or visit [www.haag-streit-usa.com](http://www.haag-streit-usa.com) to request the latest version of software

1. Click on the  tab

2. Click on the  to access the *Incision Manager*
3. Input the appropriate surgeon- based values

SIA  D

incision size  mm

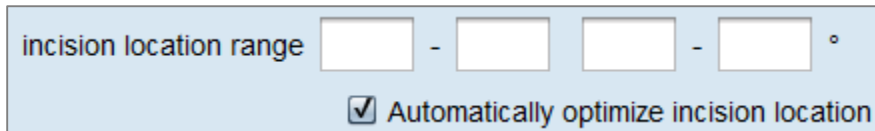

OD OS

incision location   °

incision location range  -   -  °

Automatically optimize incision location

4. You may click on the 
5. Type in a preferred incision location range if you would like for the software to automatically locate the best incision location with the least amount of anticipated residual astigmatism

incision location range  -   -  °

Automatically optimize incision location

6. Click  to save the changes

7. Select the appropriate IOL template from the dropdown box per each eye 

8. To access the Surgery Planner portion of the software, left-click on the  located to the right of the appropriate IOL formula

9. You may click on the  at the top left of the screen to locate the image you feel is best
  - a. Note: If you are using the T-cone, EyeSuite will present the photo and T-cone map with best image quality. You still have the ability to arrow through the various photos if needed

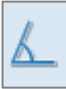

10. You may rotate the incision location on the fly if desired. Left-click on the center white square and drag to new location

The calculation will automatically recalculate and you may view the new anticipated residual astigmatism on the bottom right side of the screen

11. Click on the *Overlays* tab  to access tools for marking landmarks

❖ EyeSuite offers various tools  but the  is the one that is most commonly used

12. Left-click on the angle icon  and move cursor to the image of the eye

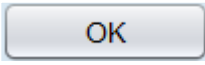

13. Left-click and drag the cursor to point out a specific landmark

14. Repeat these steps if you wish to point out multiple landmarks

15. Click on the  tab to modify the image settings such as brightness and contrast

16. Click on the  tab to view the *Incision Location Optimizer* information

17. Click the  icon at the top left to print the report or click  to return to the calculation screen to print both the IOL calculation page and the Surgery Planner report
